# Visual Studio Code Installation
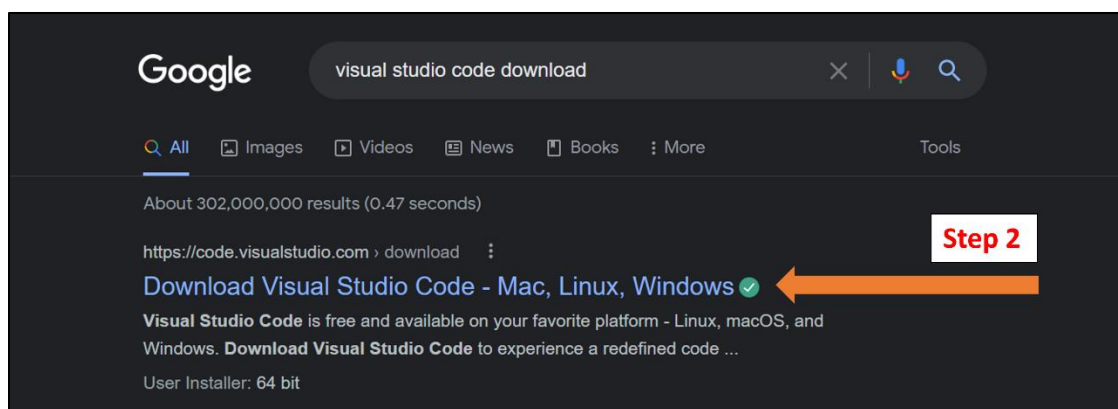

Step 1:

First of all, head over to google and type in **visual studio code download.**

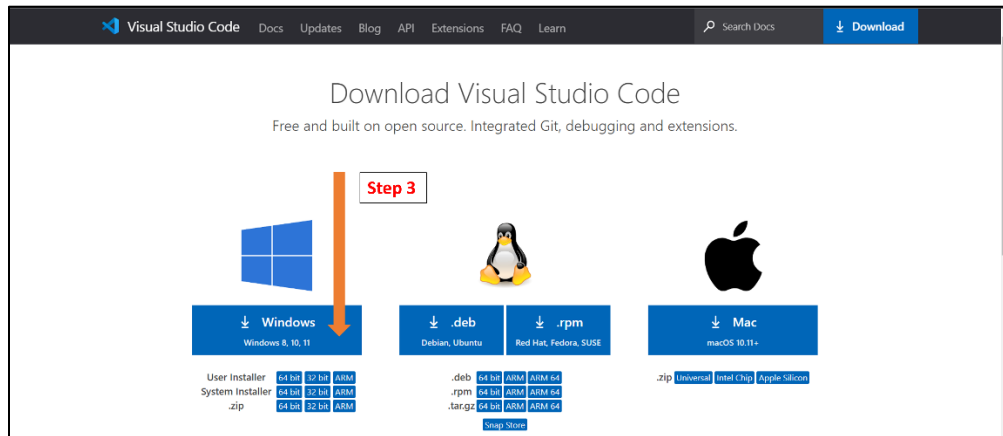

Step 2:

Click on the **below link:**

Step 3:

Download Visual Studio (VS) Code for your operating system, in this case I'm using Windows, so I'll download that:

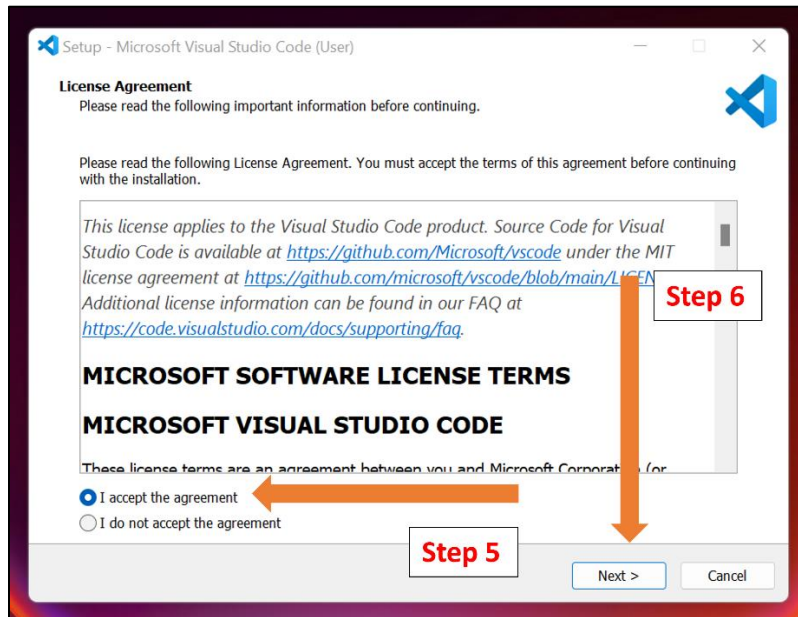

Step 4:

Wait for the VS code setup to be downloaded, then **open it** up to start the setup:
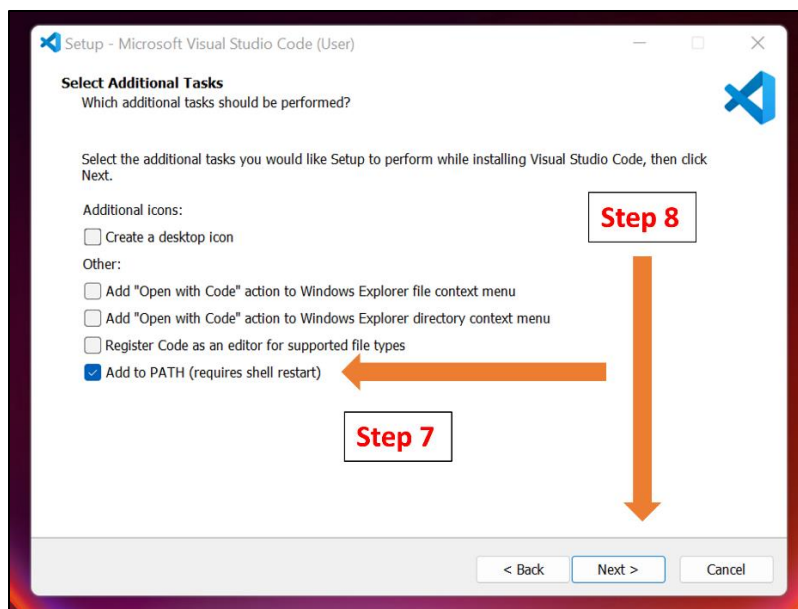

Steps 5 and 6:

Be sure to read the license agreement and then **accept the agreement**. Once you have accepted the agreement, you can **go on to the next step**.

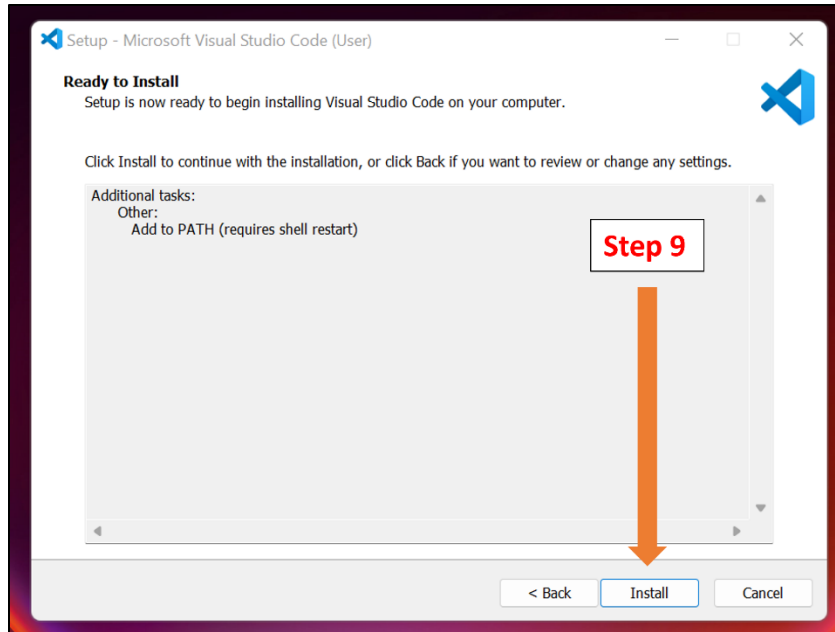

Steps 7 and 8:

Make sure that you **add VS code to PATH**. After that you **can click next.**
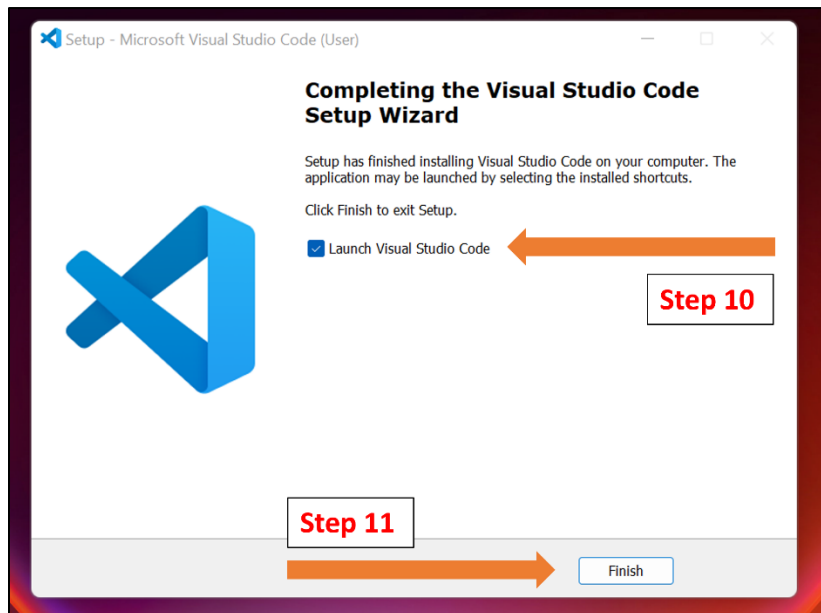

Step 9:

You can now **install VS code** on your machine.

Steps 10 and 11:

You can now **launch visual studio and finish the setup.**

Step 12:

DONE! - You have **successfully installed Visual Studio Code**. Don't worry if it has a different color, since that can always be changed
